

PERMIT FOR DRIVEWAY AND CULVERT INSTALLATION

Whereas _____ has requested permission to install a driveway and culvert at his property, situated at _____ within the limits of a Town road.

Now, therefore, a permit for the proposed installation and construction is hereby granted and the following conditions are to be met by the applicant:

When, and herein designated, work of the type indicated may be installed and maintained on the road right-of-way, all features to provide for drainage, safety and maximum use of the highway.

1. _____ (_____) inch diameter corrugated metal culvert pipe, as per Section 520 of the "State Specifications", with appropriate size steel apron endwalls, should be installed at the ends of all culverts.
2. At a distance of ten (10) feet from the edge of the bituminous pavement, the finished grade of the driveway shall be at least five (5) inches below the grade of the edge of the adjacent highway and five (5) feet from the property line. Section 8.10(2)(a)(2) of the Town of Randall Code of Ordinances is hereby made a part of this permit. Under the provisions of that ordinance, a copy of which is attached to this permit, the portion of the driveway that abuts to the edge of the bituminous pavement shall have an elevation that is at least one-half (1/2) of an inch below the elevation of the bituminous pavement.
3. No driveway may be constructed within a five (5) foot area adjacent to the property line, excluding the highway access property line.
4. The installation shall be made without danger to or interference with traffic using the Town highway.
5. All driveway surfaces and filling immediately adjacent to the traveled way shall, unless specifically authorized above, slope away from the edge of the traveled way.
6. The top width of the entrance shall be well defined and shall not exceed thirty (30) feet midway between the edge of the roadbed and the right-of-way line; provided, however, that fillets of five (5) feet radius to facilitate on and off movements may be provided at the junction of the entrance with the highway roadbed.
7. Road surfaces, slopes, shoulders, ditches and vegetation disturbed shall be restored.
8. The applicant is to obtain the culvert after the size has been determined by the Town Board, Public Works Committee or its designee.
9. The installation work may be done by the Kenosha County Highway Department or a private contractor hired by the permit applicant approved by the Town Board or its designee.

10. The work shall be carried out in a manner satisfactory to the Public Works Committee as to compliance with the conditions of this permit.

11. The work proposed under the permit must be completed by _____.

I hereby agree to the conditions

Approved:

Proposed in this permit.
